

## 1 World Economic Forum

The end to individual freedom

## 2 Overview

The World Economic Forum (WEF) was founded fifty years ago.

It has . . .

gained more and more prominence over the decades and

has become one of the leading platforms of futuristic thinking and planning.

As a meeting place of the global elite, the WEF brings together the

leaders in business, and

politics, and

a few selected intellectuals.

The main thrust of the forum is global control.

## 3 Overview

According to the projections of the WEF's "Global Future Councils," private property and privacy will be abolished during the next decade.

The coming expropriation would go further than even the communist demand to abolish the property of production goods but leave space for private possessions.

The WEF projection says that consumer goods, too, would be no longer private property.

## 4 Overview

If the WEF projection came true, people would have to rent and borrow their necessities from the state, the sole proprietor of all goods.

The supply of goods would be rationed in line with a social credit points system.

Shopping in the traditional sense would disappear along with the private purchases of goods.

Every personal move would be tracked electronically, and all production would be subject to the requirements of clean energy and a sustainable environment.

## 5 Overview

To attain "sustainable agriculture," the food supply will be mainly vegetarian.

In the new totalitarian service economy,

the government will provide basic accommodation, food, and transport while

the rest must be lent from the state.

The use of natural resources will be brought down to its minimum.

In cooperation with the few key countries, a global agency would set the price of CO2 emissions at an extremely high level to disincentivize its use.

## 6 Review

People will own nothing. Goods are either free of charge or must be lent from the state.

The United States will no longer be the leading superpower, but many countries will dominate.

Organs will not be transplanted but printed.

Meat consumption will be minimized.

Massive displacement of people will take place with billions of refugees.

A high global price will be set to limit carbon dioxide emissions.

People can prepare to go to Mars and start a journey to find alien life.

Western values will be tested to the breaking point.

## 7 Key Persons

Klaus Martin Schwab is a German engineer and economist best known as the founder and executive chairman of the World Economic Forum.

Other prominent board members are:

George Soros

Bill Gates

Al Gore

Prince Charles

Most global corporations and banks

And many others . . . especially from the Democrat party.

## **8 Annual Meeting - Davos**

The flagship event of the World Economic Forum is the invitation-only annual meeting held at the end of January in Davos, Switzerland.

It brings together chief executive officers from its 1,000 member companies, as well as selected

politicians,

representatives from academia,

NGOs

religious leaders, and

the media in an alpine environment.

## **9 Annual Meeting - Davos**

The winter discussions ostensibly focus on critical issues of global concern, such as

globalization,

capital markets,  
wealth management,  
international conflicts,  
health solutions  
social equity  
environmental problems, and their possible solutions.

## **10 The Great Reset**

The basic idea of the Great Reset is the same principle that guided the radical transformations from the French to the Russian and Chinese Revolutions.

It is the idea of constructivist rationalism (follow the science) incorporated in the state.

While the state will be the tool to implement this brave new world, it will be ruled by leaders of specific political parties, media, and certain inclusive social groups.

## **11 The Great Reset**

While earlier totalitarian regimes needed mass executions and concentration camps to maintain their power.

With the help of new technologies, it is believed that dissenters can easily be identified and marginalized.

The nonconformists will be silenced by disqualifying divergent opinions as morally despicable.

## **12 The Great Reset - Social Consent**

The bait to entice the masses is the assurances of comprehensive healthcare and a guaranteed basic income.

The promoters of the Great Reset promise a world without diseases.

Due to biotechnologically produced organs and individualized genetics-based medical treatments, drastically increased life expectancy and even immortality is said to be possible.

Artificial intelligence will eradicate death and eliminate disease and mortality.

The race is among biotechnological companies to find the key to eternal life.

### **13 The Great Reset - Social Consent**

Concerns like "lifestyle diseases, climate change, the refugee crisis, environmental degradation, completely congested cities, water pollution, air pollution, social unrest, and unemployment" are things of the past.

If we only let these self-professing benevolent nobles rule our lives, we will enter a utopian environment where there will be no more wars, sickness, and death or dying.

Where do we sign up?

Or what can possibly go wrong?
